April is Child Abuse Prevention Month. A time to focus on ways not only to protect children but also to prevent abuse from ever occurring. This is our opportunity to make a difference in young lives. Neglect is the most frequent form of child abuse. Children die simply because they're put in dangerous situations where they are not supervised, but parents are not alone. Nearly 200,000 Texas children are reported as abused or neglected every year, according to the Texas Department of Family and Protective Services.

The website www.HelpAndHope.org contains a wealth of information on how to
