## OUR NEW WEBSITE IS LIVE

[www.communityhealthcore.com](http://www.communityhealthcore.com)

We are excited to announce the launch of our newly redesigned website at [www.communityhealthcore.com](http://www.communityhealthcore.com). The website is now LIVE!

The purpose of redesigning our website is to improve visibility to the community of who we are and what we do, as well as to have information readily available for individuals and families looking for services, community partners, our staff, and the public in general.

We hope you find the new website to be inviting, informative, inspiring, and helpful.

National Post-traumatic Stress Disorder (PTSD) Awareness Month is dedicated to raising awareness about the condition and how to access treatment. June 27th is also National PTSD Awareness Day. According to the National Center for PTSD, between 7 and 8 percent of the population will experience Post Traumatic

Stress Disorder (PTSD) during their lifetime.

Men, women, and children can experience PTSD as a result of trauma in their lives. Events due to combat, accidents, disasters, and abuse are just a few of the causes of PTSD. No matter the reason, PTSD is treatable, but not everyone seeks treatment. Community Healthcore offers services to help diagnose and treatment for PTSD. There is no shame in seeking assistance. Call us at 1-800-446-8253 or visit our new website for more information and options to reach out.

**GRANT AWARDED!**

The Center was recently awarded a one-

EPISCOPAL HEALTH  
FOUNDATION

year, \$350,000 grant from Episcopal Health Foundation that began June 1, 2021. These funds will allow the Center to hire a strategic consultant to help align our organization's integration as a community mental health center, along with a CCBHC and FQHC. There are also funds for a Children's Substance Use counselor and an additional caseworker for care coordination as these are strategic priorities of the Center.
