Early Childhood Intervention (ECI)	
---	--

Persons eligible for the ECI program must:

1. Meet demographic criteria – under 36 months of age and meet initial eligibility to receive early childhood intervention services. Initial eligibility is established by:
 - (1) documentation of a medically diagnosed condition that has a high probability of resulting in developmental delay;
 - (2) an auditory or visual impairment as defined by the Texas Education Agency rules at 19 TAC §89.1040 (relating to Eligibility Criteria); or
 - (3) a developmental delay. Each developmental area must be evaluated as defined in 34 CFR §303.321. Developmental delay is determined based on:
 - (A) an evaluation using a standardized tool designated by HHSC that indicates a delay of at least 25 percent in one or more of the following developmental areas: communication; cognitive; gross motor; fine motor; social-emotional; or adaptive; or
 - (B) an evaluation using a standardized tool designated by HHSC that indicates a delay of at least 33 percent if the child's only delay is in expressive language; or
 - (C) a qualitative determination of delay, as indicated by responses or patterns that are disordered or qualitatively different from what is expected for the child's age, and significantly interfere with the child's ability to function in the environment.

When the interdisciplinary team determines there is evidence that the results of the standardized tool do not accurately reflect the child's development, eligibility must be established using a supplemental protocol designated by HHSC ECI. A child must meet the same eligibility standards in subparagraph (A) or (B) of this paragraph on the designated tool to qualify for a qualitative determination of delay unless the child has an adjusted age or chronological age of under 3 months.
